Foreword

MINISTERIAL BUDGET POLICY STATEMENT FOR FY 2016/17

Rt. Honorable Speaker, in accordance with the Section 13 (13) of the Public Finance Management Act (PFMA) 2015, I wish to present to Parliament the Ministerial Policy Statement (MPS) for FY 2016/17, comprised of Vote 016 – the Ministry of Works and Transport, Vote 113 – the Uganda National Roads Authority, Vote 118 – the Uganda Road Fund and Vote 500 for funds disbursed to Local Governments for road works under Peace, Recovery and Development Plan (PRDP) and Rural Transport Infrastructure (RTI) programmes.

The MPS was prepared in line with the mandate of the Ministry of Works and Transport and the line Transport Agencies thereof (Uganda National Roads Authority, Uganda Road fund, Civil Aviation Authority and Uganda Railways Corporation). The Policy Statement addresses the key Transport Sector objectives and interventions in the Second National Development Plan (NDPII) 2015/16 – 2019/20 and the aspirations of the National Resistance Movement. Investments in that direction will lead to a reduction in the cost of transport and improved competitiveness of the Economy.

In the FY 2016/17 the Sector has prioritized financing ongoing programmes/projects in the road, air, railway and inland water transport subsectors. Substantial resources have been allocated to ongoing road links under development/reconstruction and maintenance and construction of the New Standard Gauge Railway Line. Financing under inland water transport will support ferry services on the inland water bodies and development of master plans and designs for ports along the central corridor. Under air transport, concentration will be on the on-going project for expansion of Entebbe International Airport. The tax obligation in respect of the project for FY 2016/17 amounts to USD 15,940, 161 which is an unfunded priority.

The Policy Statement outlines the performance of the FY 2015/16 and the planned activities and budget allocation for the FY 2016/17; it further spells out the challenges and constraints faced by the Sector in the execution of its mandate.

Rt. Honorable Speaker, I register my appreciation to the Development Partners for their continued support to the Sector. I thank members of the Sectoral Committees on Physical Infrastructure and National Economy, Line Ministries, Departments and Agencies, Local Governments, the Private Sector and Civil Society Organizations for the support and cooperation extended to the Transport Sector in the FY 2015/16. With this support, the Sector is committed to provide reliable and safe works, transport infrastructure and services.

Rt. Honorable Speaker, I now wish to table the FY 2016/17 budget estimates for the Transport Sector amounting to UGX 3,489.261bn for your review and approval as follows:

Structure of the Ministerial Policy Statement

“Each Minister shall cause to be prepared and submitted to Parliament a Policy Statement of the relevant Ministry on the preliminary [budget] estimates by the 30th day of June in each year”. Budget Act 2001, Section 6 (1)

Vote Functions

Since the FY2014/15 budget cycle, the preparation of sector BFPs, Ministerial Policy Statements and Budget Estimates centre around the notion of Vote Functions. A Vote Function is a set of programmes, projects, and Local Government Grants, defining the roles and responsibilities of a vote/institution, and contributing towards the attainment of vote and overall sector objectives.

As such, a Vote Function provides detailed information on centralised services, by capturing allocations to Central Ministries and Stand Alone Votes, and decentralised services funded via grants to Local Governments

Structure

The Ministerial Policy Statement is structured by Vote, as follows:

- **Staff Establishment Structure**

Provides details of approved staff structure for each programme and project (including names of staff and vacant posts). This is clearly demonstrated in the form of an organogram.

- **Vote Overview**

This section sets out past performance and future plans for Central and Local Government Votes in more detail. It is structured as follows for each Vote: A Vote Overview sets out key details of the vote, including past performance, future plans and key performance issues to be addressed including costing implications.

- **Vote Annexes**

Annex Recommendations from parliament and institutional responses

Project 1096 Support to Computerised Driving Permits

Project Profile

Responsible Officer: Computerised Driving Permit (CDP) Project Management Team

Objectives:

- i. To improve safety of road users by improving competence of drivers on the country's road network.
- ii. To establish a data recovery / back-up Centre for all data generated at the Uganda Computerised Driving Permits production facility.
- iii. Enhance knowledge and technical skills transfer of the local human resource team.
- iv. To establish a modern driver testing facility and model driver training school.

Outputs:

- i- Safety of Road Users enhanced;
- ii. Data Recovery Centre/Business Continuation Site for all the generated data at the Uganda Computerised Driving Permits established;
- iii. Computerised Driving Permits and PSV driver badges processed and issued
- v. Knowledge and technical skills transfer of the local human resource in the Computerised Driving Permits project enhanced
- vi. Forgeries of driving permits reduced

Vote: 016 Ministry of Works and Transport

Vote Function: 04 03 Construction Standards and Quality Assurance

Vote Function Profile

Responsible Officer: Comm (Roads/Bridges, Public Structures & Qty Mgt),

Services: The vote function is aimed at developing policies, laws, standards, and guidelines that would ensure effective, safe, efficient and adequate delivery of services in the construction industry. It will involve amongst others enforcement and regulation of national construction standards, testing and researching on materials of construction and evaluation of pavement/structures; provision of technical support services to other Government departments and agencies; and monitoring the relevant activities in the construction industry. In addition it will entail integrating cross-cutting issues in the Sector plans and programmes (i.e. issues concerning gender, people with disabilities, HIV/AIDS, etc). It will also involve preparatory process for establishing a National Construction Research Institute out of the current Material Testing and Research function.

Furthermore, it will participate in formulating policy guidelines for planning, development and maintenance of national transport infrastructure; developing and maintaining a road reserve information system and ensuring its enforcement;

(i) Measures to improve Efficiency

In order for the Vote to realize the budget allocation efficiency, the following measures were considered:

- 1) Priority projects listed in the NDP and over roll projects meant to fulfill the NDP objectives.
- 2) Projects with running contracts to minimize payment of accrued interest due to delayed payment to contractors and consultants
- 3) Projects coming to close were given minimum allocations.
- 4) Consideration was given to fund some of the recommendations from the 11th Joint Transport Sector Review

(ii) Vote Investment Plans

The capital expenditure over the medium term will increase tremendously. However, the capital expenditure will first decline from UGX 556.6bn in FY 2015/16 to UGX 192.9bn in FY 2016/17 representing 48.1% of the total budget. The decrease is due to the phasing of the projects like the Expansion of Entebbe Airport, the Physical works for the SGR have not yet commenced and the lack of development partner financing for the Japanese equipment in the resource envelop. There will rather be an increase to 79.9% of the budget to capital expenditure in FY 2017/18 and to 88.4% in FY 2018/19.

The vote will only spend 11.4% of its budget on consumption expenditure (UGX 78.9bn) while 32.3% of its budget will be spent on grants and subsidies mainly to CAA and URC (UGX 129.6).

(iii) Priority Vote Actions to Improve Sector Performance

Sector performance during the FY will be improved through the following:

1 - Establishment of Uganda Construction Industry Commission (UCICO) to regulate the construction industry

2 - Operationalization of the Building Control Act through developing the National Building Code and establishment of the National Building Review Board Committees and Secretariat

3 - Formulation and implementation of new policies and guidelines and review of some existing laws to suit the existing environment. These include National Transport Policy and Strategy, Inland Water Transport Policy, Axle Load Control Policy, Traffic and Road Safety Act 1998, National Air Transport Policy, Guidelines for Environment and Social Impact Assessment for Water and Railway Transport Projects, Guidelines for implementation on non-motorised transport policy developed, Standards and Guidelines for Low Cost sealing approach

4- Full implementation of Force Account Scheme through acquisition of additional road equipment to reduce maintenance backlog and rehabilitation of district and urban roads

5 – Development of Intermodal Transport Strategy to facilitate development of efficient, effective and sustainable transport system

5 – Railway transport development through design and construction of standard gauge railway network to reduce over dependency on road network and other associated benefits of a developed railway industry i.e. maximum load, lower transport costs, safety and environment

6 - Implementation of the mandatory Motor vehicle inspection scheme and strengthening on computerized deriving permit scheme to ensure improved road safety.

Total for Vote:	68.451	928.024	94.877	399.129	1,145.616	2,094.981

(i) The Total Budget over the Medium Term

Over the medium term, the vote budget will decrease from UGX 928.024bn to UGX 401.419bn in FY 2016/17 and later increase to UGX 1,145.616 and UGX 2,094.981bn in the FY 2017/18 and FY 2018/19 respectively.

(ii) The major expenditure allocations in the Vote for 2016/17

Transport Services and Infrastructure is the biggest cost center with an overall allocation of UGX 1,056.141 bn followed by DUCAR with an allocation of UGX 18.700bn. In the third position is Mechanical Engineering Services with an overall allocation of UGX 17.121bn followed by Construction Standards and Quality Assurance at UGX 15.807bn. The least funded vote functions are Policy, Planning and Support services and Transport Regulations with an allocation of UGX 9.454bn and UGX 7.565bn respectively.

(iii) The major planned changes in resource allocations within the Vote for 2016/17

Major planned changes in resource allocation in vote 016 are attributed to the Right of way acquisition for the Standard Gauge Railway and the commencement of Actual construction of the SGR, upgrade and expansion Entebbe International Airport to accommodate current and future traffic and also promote service excellence; maintenance of Aircrafts and Buildings and procurement of a Twin Engine for the EACAA to ensure that students graduate in time and the cost of training from Entebbe Airport is reduced and support to the development of ports on Lake Victoria to open the Southern route in order to link water to railway transport to enhance multimodal transport.

There is a major reduction in resource allocation in the output of Purchase of Specialized Machinery & Equipment. This is attributed to the lack of counterpart funding for the Japanese Road Equipment. However, the funds will be accessed when GoU provides the 15% counterpart funding.

(ii) Vote Investment Plans

In the medium term, 60% of UNRA's development budget will be allocated to upgrading gravel roads to bitumen standard in line with the NDP target of increasing the stock of paved roads by 400km annually. Similarly, about 30% of the development will be allocated to rehabilitation of the old paved roads as part of the strategy to reducing the road maintenance backlog. Construction of Bridges - the New Nile Bridge and others will be given substantial budget allocation because most of the exiting bridges need to be replaced to cope with current traffic and vehicle loads.
